PROJECTS

Lightshiprv website clone link

- The LightshipRV Website Recreation project is a web development endeavor that aims to recreate the essence of the LightshipRV website using a combination of HTML, CSS, JavaScript, GSAP, and Canvas.

Hogi.io (Digital Marketing and Branding Agency) link

- Led the redevelopment of the hogi.io website, a cutting-edge online platform, using a robust tech stack that includes HTML, CSS, and JavaScript.

Obys.agency (Designing Agency) link

- Led the development of the Obys Agency website, a dynamic and responsive online platform showcasing the agency's portfolio and services.

Moqo.be website clone (Branding agency) link

- Developed a responsive layout to ensure optimal viewing across various devices, enhancing accessibility for potential employers.

B-egg website clone link

- BEGG | High-Quality Liquid Egg Products for Every Need
- Designed and implemented a dynamic and visually appealing resume website using HTML, CSS, and JavaScript.

INTEREST

I am deeply passionate about learning, driven by a love for staying ahead in technology and a commitment to constant improvement. I eagerly explore new skills and concepts, seeing each challenge as a chance for personal and professional growth.
